Round Up Change From
Everyday Purchases
And
Donate The Difference!

What's Round-Up?

Gyve's Round-Up feature rounds up the change from every-day purchases, accumulates it and then donates it to The Village Christian Church. This happens when you sign-up for Round-Up and use your debit or credit card for everyday purchases like pumping gas, buying a burger, or going out with friends.

Every purchase made with a card attached to the Round-Up feature adjusts the purchase price to the nearest dollar and collects the difference for donation. If a purchase is \$3.12, the new total transaction amount reads \$4.00. The \$0.88 difference accumulates and once it accumulates to \$20, Gyve makes the donation to The Village Christian Church. Super easy!

An account must be selected as a Round-Up account. Any debit/credit card, or ACH account can be selected to be used.

All Round-Up funds will be used outside the walls of the church to help individuals or organizations in need.

There's an option to "Pause this month", which if selected transactions will be paused for that month only. The following month the account will be reactivated automatically.
